WRONGFUL DEATH MOTION CONTINUED

Jennifer Lynn Williams was my eldest Daughter she went to have a very simple surgery done at Alaska Native Medical center. This was june of 2023. During the surgical procedure the surgical staff put gas into jennifer Lynn williams stomach the pressurized gas ended up perferating her liver. This resulted in the pressurized gas to go directly into Jennifer's blood stream. Jennifer flat lined as a result and then went into heart failure. Because the surgical staff took so long to revive Jennifer and her brain and body was deprived of oxygen she became into a vegtated state where she was monitored daily. This continued for about 5 month's until the family decided to let her be put into hospice care Jennifer then was transferred from Alaska Native Medical center to a hospice facility in Sitka alaska. Jennifer tracheotomy tube then got damaged and infected she was transferred back to Alaska Native Medical center.Jennifer stayed at Alaska Native Medical center until Nov 2023 where she finally did surcome to her injuries.
